Deadline for manuscript  
submissions:

**closed (9 December 2019)**

### Message from the Guest Editor

Dear colleagues,

In this Special Issue we would like to highlight research papers, reviews, or short communications that emphasize the developments and applications of microfluidic platforms that are capable of maintaining single or large and mixed populations of cells in 2D and 3D organotypic cultures, whole organoids, small tissue samples, or organs-on-a-chip that address pressing questions in biology, toxicology, development of novel therapeutics, or the better understanding of disease progression. Since microfluidic bioreactors do not exist on their own, we would also like to invite papers that deal with bioreactor support infrastructures such as platform interconnects, novel biomaterials for microfluidic applications, microscale fluid handling, and sampling including novel micropumps and valves, as well as effluent sensing and detection schemes and assay developments compatible with microfluidic volumes.

an Open Access Journal by MDPI

## Editor-in-Chief

## Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

**Journal Rank:** JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)
