Chemical Biology, McMaster  
University, 1280 Main Street West,  
Hamilton, ON L8S 4M1, Canada

**Dr. Aline Cerf**

Laboratory for the Analysis and  
Architecture of Systems, Centre  
National de la Recherche  
Scientifique, 7 avenue du Colonel  
Roche, 31070 Toulouse, France

Deadline for manuscript  
submissions:

**closed (30 June 2019)**

### Message from the Guest Editors

Micropatterning allows the targeted spatial modification of bulk, surface, or interfacial properties at the micron to nanoscale. Micropatterning approaches have been used in the past to develop functional sensing devices, smart coatings, and biomolecular patterns, among many other structured materials. These have been used, for example, in microfluidic or portable point of care devices, self-cleaning surfaces, or tissue engineering applications. In this Special Issue, we focus on new developments in micropatterning approaches, such as micropatterning within microfluidic devices, multiplexed micropatterning, patterning in three-dimensional structures, as well as new chemistries and materials, and the applications derived from them. We invite original research contributions, short communications, and in-depth reviews from early career and established researchers. The goal of this Special Issue is to capture the state-of-the-art in micropatterning techniques and the wide range of applications that these technologies can be deployed in. We look forward to and welcome your contributions to this Special Issue.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China  
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

## Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
