Message from the Guest Editors

In this Special Issue, we focus on new developments in micropatterning approaches, such as micropatterning within microfluidic devices, multiplexed micropatterning, patterning in three-dimensional structures, as well as new chemistries and materials, and the applications derived from them. We invite original research contributions, short communications, and in-depth reviews from early career and established researchers. The goal of this Special Issue is to capture the state-of-the-art in micropatterning techniques and the wide range of applications that these technologies can be deployed in. We look forward to and welcome your contributions to this Special Issue.

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
