Message from the Guest Editor

Dear Colleagues,

With the main aim to provide solutions to our dependence on fossil fuel systems such as oil and gas supply, this Special Issue is focused on research, development, and innovation of power electronics components, devices, and control techniques in areas such as (but not limited to) renewable energy, diversification of energy supply, and efficient use of natural resources, which seem to be, once more, the most feasible answers to our problems.

Topics of interest include but are not limited to the following:

- Power electronic technologies and techniques for energy conversion
- Power electronics and renewable energy systems
- Power electronics and energy storage devices, systems, and control techniques
- Power electronic interfaces for energy systems
- Power electronics for harvest energy
- Power electronic converters
- Power electronics in pico-grids and micro-grids
- Optimization in power electronics with applications to renewable energy conversion
- Intelligent power electronics in renewable energy systems
- Electric/hybrid vehicle converters

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
