Message from the Guest Editor

Dear Colleagues,

POC diagnostic devices are very convenient for continuous monitoring of analytes near the patient. The current COVID-19 pandemic clearly showed the importance of POC diagnostic devices for rapid disease diagnosis and monitoring. The scope of this Special Issue includes any research utilizing micro-engineering technologies and life sciences for the development of a POC device for a rapid diagnostic and screening.

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
