Message from the Guest Editor

The relationship between firing patterns of the central nervous system and our behavior has become one of the most important research topics of this decade and will continue to gain importance in the future. Perhaps this is one of the last frontiers of discovery regarding human behavior, intelligence, and emotion. Understanding the human brain and how it works and how it determines what we do, what we think and what we feel, may enable us to understand the origin of many things we do, think and feel.

This Special Issue on biomedical imaging devices will cover the timely topic of intrusive and non-intrusive devices for imaging signals originating from brain's neuron firing. It will be collection of modern brain imaging techniques with an emphasis on portable or potentially portable imaging devices that may enable in-situ and in-vivo imaging of human brain activity in their natural environment. Direct imaging as well as imaging through enhanced blood flow, and through other intermediaries are included.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
