Message from the Guest Editors

Dear Colleagues,

The role of micro- and nanotechnologies in photonics has been growing fast in the last two decades, following a similar path as electronics in the previous years. If micro-optics made its first steps in the 1970s, with the developments of optical fibre systems and integrated optical waveguides, the beginning of nanophotonic may be associated with the discovery of photonic crystals at the end of 1980s. It is only after the beginning of this century, however, that micro- and nano-photonics have departed from their infancy and stepped into a new era, where they have fully shown their inclusive nature, providing the tools for innovative and sophisticated control of the properties of light at micro and nano scale. Thus, new or advanced structures and devices are being designed and implemented. Microresonators and metamaterials are only two examples of these advances.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Ai-Qun Liu

1. Department of Electrical and Electronic Engineering, The Hong Kong Polytechnic University, Hong Kong, China
2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Mechanical Engineering*)
