Message from the Guest Editors

Dear Colleagues,

Electrochemical sensors, normally as a type of liquid-based sensing devices, present distinguished advantages in comparison with traditional solid-state detection instruments. The device employs the electrochemical reaction in the electrolyte system as the readout mechanism to transduce various input signals, such as mechanical, electrical or optical stimulus, to the electrical output. This electrolyte-ion-based working principle provides not only a high performance, such as high resolution, low noise floor, high dynamic range, and wide bandwidth, but also the flexibility of deployment, e.g., high shock tolerance, short settle down time, and gravity independence. This Special Issue is to present the most recent advancement in electrochemical sensors related research to the micromachines society.

- Electrochemical sensors
- molecular–electronic transducers
- liquid-based sensing devices

2. School of Electrical and Electronic Engineering, Nanyang Technological University, Singapore 639798, Singapore

Message from the Editor-in-Chief

You are invited to contribute research articles or comprehensive reviews for consideration and publication in *Micromachines* (ISSN 2072-666X). *Micromachines* is published in the open access format. Research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. As an open access journal, *Micromachines* is supported by the authors or their institutes by payment of article processing charges (APC) for accepted papers. We are pleased to welcome you as our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, dblp, and other databases.

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Mechanical Engineering)
