

## Genomics and Epidemiology of Clinical Microorganisms

Guest Editors:

**Dr. Addy Cecilia Helguera-Repetto**

Departamento de  
Inmunobioquímica, Instituto  
Nacional de Perinatología Isidro  
Espinosa de los Reyes, Mexico  
City 11000, Mexico

**Dr. Moises Leon-Juarez**

Instituto Nacional de  
Perinatología, Mexico City,  
Mexico

Deadline for manuscript  
submissions:

**31 October 2024**

### Message from the Guest Editors

Genomics and Epidemiology of Clinical Microorganisms play a pivotal role in advancing our understanding of infectious diseases, guiding clinical practice, and informing public health policies. By harnessing the power of genomic analysis and epidemiological insights, we can effectively combat infectious diseases and safeguard global health.

This special issue aims to explore how genomics and epidemiology intersect to understand the dynamics, evolution, and clinical impact of microorganisms. Topics covered include genomic characterization of pathogens, evolutionary dynamics, transmission dynamics and outbreak investigations, host-pathogen interactions, One Health perspectives, bioinformatics and computational tools, clinical implications and public health interventions, and emerging technologies and methodologies. By providing a platform for sharing research findings and insights, this issue aims to improve our understanding of infectious diseases and help us find better ways to prevent and control them.

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
