Message from the Guest Editor

Dear Colleagues,

Recently increasing cases of Human Monkey Pox Virus diseases have been diagnosed in several countries. Most of them are very apparently non-related, and most of them occurred among MSM.

Several grey areas and open questions could be addressed in a Special Issue of *Microorganisms*.

- Way of transmission: the role of others than sexual transmission
- Course of the disease according to host-related variables (age, sex, genetics...)
- Prevalence and clinical course of MPV among PLWH
- Response to antivirals
- Role of vaccination for Pox virus in preventing MPV

Prof. Dr. Antonella d'Arminio Monforte

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
