

Endophytic Fungi and Their Role in Achieving the UN Sustainable Development Goals

Guest Editors:

Prof. Dr. Ahmed Ibrahim El-Batal

Dr. El-Sayed R. El-Sayed

Dr. Gharieb S. El-Sayyad

Dr. Shaimaa A. Mousa

Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editors

This Special Issue will explore the role of endophytic fungi in achieving the UN Sustainable Development Goals 2, 3, 6, 13, and 15. Fungal endophytes include any fungus living within any part of the plant without any apparent symptoms. Fungal endophytes have been recognized by the pharmaceutical, food, and agricultural sectors due to their distinctive metabolic and genetic diversity and their producing capability of several new and novel secondary metabolites and nanoparticles with promising applications. Topics relating to the UN Sustainable Development Goals will include all research areas of using endophytic fungi in agriculture, food, natural products, production and sustainability, biotransformation, waste and biomass valorization, bioremediation, biocontrol, and nanotechnology.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
