Guadalajara, Guadalajara,
Mexico

Dr. Angélica Villarruel-López

Department of Pharmacobiology,
Universidad de Guadalajara,
Guadalajara 44100, Mexico

Message from the Guest Editors

This Special Issue aims to present control strategies for foodborne pathogens at any step of the food supply chain. Research areas may include (but are not limited to) the following: the development, implementation, and/or validation of pre-harvest and post-harvest interventions for foodborne pathogens; the use of natural antimicrobials or antagonistic microorganisms for the control of foodborne pathogens; and intervention strategies in food service establishments, as well as at the consumer level, to reduce the risk of foodborne illness. In this Special Issue, original research papers and reviews are welcome.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))
