

## Probiotics and the Immune System: The Potential for Postimmunobiotics 2.0

Guest Editors:

**Prof. Dr. Haruki Kitazawa**

International Education and Research Center for Food and Agricultural Immunology (CFAI), Graduate School of Agricultural Science, Tohoku University, Aobaku, Sendai 980-8572, Japan

**Dr. Julio Villena**

Laboratory of Immunobiotechnology, Reference Centre for Lactobacilli (CERELA-CONICET), Chacabuco 145, San Miguel de Tucuman CP400, Argentina

**Prof. Dr. A. K. M. Humayun Kober**

Department of Dairy and Poultry Science, Chittagong Veterinary and Animal Sciences University, Chittagong, Bangladesh

Deadline for manuscript submissions:

**closed (31 December 2023)**

### Message from the Guest Editors

This Special Issue is a continuation of our 2023 Special Issue "Probiotics and the Immune System: The Potential for Postimmunobiotics 2.0".

Welcome to the Special Issue "Probiotics and the Immune System: The Potential for Postimmunobiotics 2.0" of *Microorganisms*. Probiotic microorganisms are considered to support the host's health. Scientific criticism based on poorly characterized isolates, soft clinical targets, and the absence of a mechanistic framework limited the value of the probiotic concept. Thus, studies on how probiotics work at the cellular and molecular level are mandatory to expand their industrial applications.

This Special Issue welcomes contributions in this field covering the following areas:

- Isolation and identification of novel immunobiotics;
- Identification and characterization of novel postimmunobiotics;
- Design and characterization of immunobiotics- or postimmunobiotics-supplemented functional products;
- Effects of immunobiotics and postimmunobiotics products in the modulation of the microbiota;
- Cellular and molecular interactions of immunobiotics and postimmunobiotics with the host

an Open Access Journal by MDPI

Research, 04318 Leipzig,  
Germany

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
