Message from the Guest Editors

Dear Colleagues,

This Special Issue aims to provide a comprehensive overview of state-of-the-art medical microbiology in Japan. We encourage Japanese researchers from related fields to contribute papers highlighting the latest developments in medical microbiology or to invite relevant experts and colleagues to do so. This Special Issue will publish full research articles and comprehensive reviews.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in highquality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits
