

## Pathogen Infections and Respiratory Diseases

Guest Editors:

**Dr. Nobuhiro Asai**

**Dr. Hideo Kato**

**Prof. Dr. Hiroshige Mikamo**

Deadline for manuscript  
submissions:

**31 December 2024**

### Message from the Guest Editors

As global public health challenges become increasingly severe, respiratory diseases and related pathogen infections have become the focus of our attention. Despite the advances in diagnostic methods and antibiotic therapy, respiratory disease is the world's leading cause of death due to infection. Pathogen infections and the respiratory diseases that they cause have become important challenges in global public health.

This Special Issue will provide a comprehensive discussion of pathogenic infections and their relationship with respiratory diseases. We will focus on different types of pathogens, including viruses, bacteria, fungi, etc., and explore their characteristics and pathogenic mechanisms. This Special Issue will bring together the latest research results and clinical experiences from around the world, covering topics such as, but not limited to, pathogens infection mechanisms and host responses, as well as the diagnosis, prevention, and treatment of respiratory diseases. By gaining a deeper understanding of these pathogens, we can better understand their impacts on the respiratory system and provide a scientific basis for disease prevention and treatment.

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
