Trypanosomatid Biology

Guest Editor:

Dr. Alexei Kostygov
Department of Biology and Ecology, University of Ostrava, Ostrava, Czech Republic

Deadline for manuscript submissions:
closed (31 January 2024)

Message from the Guest Editor

Dear Colleagues,

This Special Issue welcomes research articles, reviews and brief research reports devoted to the biology of these fascinating parasitic protists, focusing (but not limited to) on cell and molecular biology, genomics, ecology, host–parasite relationships, life cycles, intracellular bacteria and viruses. We look forward to receiving your contributions to the knowledge of the biology of trypanosomatids, including dixenous (Trypanosoma, Leishmania, Phytomonas) and monoxenous genera (Leptomonas, Crithidia, etc.).

- host–parasite relationships
- life cycles
- molecular and cell biology
- endosymbionts
- genomics

Special Issue

Editor-in-Chief

Dr. Nico Jehmlich
Department of Molecular Systems Biology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
