Parasitología, Facultad de
Medicina, University of Antioquia
| UdeA, Medellín, Colombia

**Prof. Dr. Fernando de la Hoz-
Restrepo**

Departamento de Salud Pública,
Universidad Nacional de
Colombia, Bogota, Colombia

Message from the Guest Editors

Since 2010, the World Health Assembly included hepatitis A virus (HAV), hepatitis B virus (HBV), hepatitis C virus (HCV), hepatitis D virus (HDV), and hepatitis E virus (HEV) infection as a priority. The control and elimination of viral hepatitis is a priority of the World Health Organization (WHO). This Special Issue of Microorganisms plans to collect recent research on the control and elimination of hepatitis virus. Original research articles and comprehensive reviews that cover hepatitis virus infection, epidemiology, molecular characterization, antiviral treatment, and antiviral agents are welcome.

Deadline for manuscript
submissions:

15 July 2024

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
