

Biopathology of Microbial Infections 2.0

Guest Editors:

Prof. Dr. Efthymia Petinaki

School of Medicine, University of
Thessaly, Karditsa, Greece

Prof. Dr. George Fthenakis

Faculty of Veterinary Medicine,
University of Thessaly, 224
Trikalon, 43100 Karditsa, Greece

Deadline for manuscript
submissions:

closed (31 July 2023)

Message from the Guest Editors

Microbial infections continue to be a global threat to public health. Furthermore, microbial diseases of animals can have significant economic impacts and zoonotic implications.

In-depth knowledge of the virulence and pathogenicity of microorganisms is important for the diagnosis and control of these infections. Research into improved diagnostic approaches for microbial diseases, particularly those encompassing -omics approaches, can contribute to the quick and accurate diagnosis of microbial infections. Work into new therapeutic approaches, targeting the virulence factors of microorganisms (e.g., toxins, spores, and biofilms), will improve the clinical therapeutics of infections. Studies into the development of novel immunological products or improved management approaches will contribute to the effective control of microbial infections.

This Special Issue will focus on publications covering human and animal microbial infections, with special reference to work relevant to their diagnosis, therapeutics, and control. Researchers in the field are invited to submit cutting-edge work for evaluation and potential publication as part of this Special Issue.

an Open Access Journal by MDPI

Research, 04318 Leipzig,
Germany

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
