

Women in Virology: 2022–2023

Guest Editors:

Dr. Andrea Marzi

Laboratory of Virology, DIR,
NIAID, NIH, 903 South 4th Street,
Hamilton, MT 59840, USA

Dr. Ilhem Messaoudi

Department of Microbiology,
Immunology and Molecular
Genetics, University of Kentucky,
760 Press Ave, Lexington, KY
40536, USA

Deadline for manuscript
submissions:

closed (31 July 2023)

Message from the Guest Editors

Long-standing biases and gender stereotypes both in the past and today have discouraged talented girls and women from pursuing research. Presently, fewer than 30% among the total number of researchers worldwide are women, and even fewer are in leading research positions. Our goal is to encourage a change in the traditional mindset and to move toward a more equal gender distribution by promoting gender equality in STEM careers.

Microorganisms is proud to support our efforts and to promote the scientific accomplishments of women scientists across all fields of virology in this Special Issue. Here, we will highlight the outstanding research performed advancing basic, translational, and clinical aspects of virology.

We welcome reviews and research articles documenting current knowledge about viruses, addressing aspects of molecular virology, virus–host cell interactions, human disease and pathogenesis, public health impact and epidemiology, animal model development, and the status of countermeasure development: vaccines, therapeutics, and diagnostics.

To be considered for this Special Issue, the first and/or last author should be a researcher identifying as a woman.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
