

Molecular Epidemiology, Diagnostics and Management of Respiratory Virus Infections 2.0

Guest Editors:

Prof. Dr. Hirokazu Kimura

Department of Health Science,
Gunma Paz University, Takasaki-
shi, Gunma Prefecture, Japan

Dr. Mitsuru Sada

Advanced Medical Science
Research Center, Gunma Paz
University, Shibukawa 377-0008,
Japan

Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editors

This Special Issue is the continuation of our previous Special Issue "Molecular Epidemiology, Diagnostics and Management of Respiratory Virus Infections", which was published in 2020.

Although many types of viruses affect acute respiratory infection in humans, most of them are not well-controlled/prevented at present. To better understand this type of infection, it may be important to elucidate their molecular epidemiology. Moreover, to treat respiratory infections, the accurate diagnosis and management of the diseases are essential. From these circumstances, we will focus on molecular epidemiology based on advanced bioinformatics technologies and recent advances in the diagnosis and management of various viral respiratory infections.

Manuscripts that deal with systemic reviews will only be acceptable in rare cases.

Keywords:

- viral respiratory infections
- molecular epidemiology
- diagnostics
- management

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
