Message from the Guest Editors

Dear Colleagues,

Extending the shelf-life of food products according to food safety is a major concern of both producers and consumers, especially when dealing with a green technology approach. Researchers have developed different methods to contribute to this topic, and this Special Issue aims to collect original research articles, short communications, and reviews, on all aspects of food preservation by employing natural antimicrobials or applying green technologies to extend food products shelf-life or improve food safety.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
