Korea

Deadline for manuscript  
submissions:

**closed (29 February 2024)**

### Message from the Guest Editor

Enterobacteriaceae are important zoonotic foodborne bacteria capable of endangering human health and useful indicator of hygiene. This Special Issue proposes to build upon one more piece of the molecular characteristics, pathogenicity and antimicrobial resistance in Enterobacteriaceae, through attracting and agglutinating the new data, updates, opinions, points of view and scientific perspectives of Enterobacteriaceae.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
