

Microalgal Biotechnology: Innovations and Applications

Guest Editor:

Dr. Ihana A. Severo

1. Researcher at Sustainable Energy Research & Development Center (NPDEAS), Federal University of Paraná (UFPR), Curitiba, PR, Brazil
2. Department of Mechanical Engineering, FAMU-FSU College of Engineering, Center for Advanced Power Systems (CAPS), Florida A&M University, Florida State University, Tallahassee, FL, USA

Deadline for manuscript submissions:

30 November 2024

Message from the Guest Editor

Dear Colleagues,

We are pleased to invite you to contribute to a special issue titled "Microalgal Biotechnology: Innovations and Applications". This special issue aims to highlight the latest research and technological advancements in the field of microalgal biotechnology. Microalgae are promising biological resources due to their ability to produce a wide range of valuable products of commercial interest, including biofuels/bioenergy, biofertilizers, pharmaceuticals, and nutraceuticals, as well as their applications in environmental sustainability, such as wastewater treatment and CO₂ sequestration.

By bringing together cutting-edge research and expert reviews, this special issue aims to serve as a valuable resource for researchers and practitioners working to unlock the full potential of microalgae in biotechnology. We look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
