**Prof. Dr. Solveig Tosi**

Mycology Laboratory,  
Department of Earth and  
Environmental Sciences,  
University of Pavia, Via S. Epifanio  
14, 27100 Pavia, Italy

Deadline for manuscript  
submissions:

**closed (30 April 2021)**

### Message from the Guest Editors

In this Special Issue of *Microorganisms*, entitled “Fungal Biodiversity for Bioremediation”, we aim to increase knowledge through the latest research in these areas. We encourage researchers to send their research papers or reviews dealing with the investigation of fungal potential in bioremediation. Some of the potential topics include:

Biodiversity from polluted environments: native fungal strains as bioresources;

Fungal capacity of handling and degrading pollutants;

Studies on phenotypical, physiological, and multi-omics approaches to evaluate fungal traits useful in bioremediation;

Synergistic interactions in mycoremediation: saprotrophic and mycorrhizal fungi-assisted phytoremediation; fungi–bacteria consortia;

Fungi in remediation biotechnology: strengths and weaknesses.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
