Faculty of Biology, University of
Gdansk, Gdansk, Poland

Deadline for manuscript
submissions:

closed (15 March 2024)

Message from the Guest Editors

Dear Colleagues,

Research areas may include (but are not limited to) the following:

1. The influence of food storage conditions (temperature, pH, oxygen, time, etc.) on changes in food microbiota and/or on the multiplication of undesirable microorganisms in food.
2. New insight into interspecies interactions between bacteria providing protection against contamination.
3. The identification of natural food microbiota metabolites as potential antimicrobials protecting against pathogen invasion.
4. Evaluation of the microbiological quality of food in light of applicable provisions of food law.

Original research articles and reviews are welcome. We look forward to receiving your contributions.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
