Londrina, Paraná, Brazil

**Prof. Dr. Fabiano José Ferreira
De Sant'Ana**

Laboratory of Veterinary
Pathological Diagnosis, Faculty
of Agronomy and Veterinary
Medicine, University of Brasília,
Brasília, DF, Brazil

Deadline for manuscript
submissions:

15 November 2024

Message from the Guest Editors

Dear Colleagues,

The articles in this Special Issue will cover a range of topics related to infectious diseases in livestock. They will provide insights into the pathogenesis of various infectious agents, including viruses, bacteria, fungi, protozoa, and other parasitic pathogens, and how these agents interact with their hosts to cause disease.

In addition, this Special Issue will highlight the latest advances in the diagnosis of infectious diseases in livestock. We invite articles describing various diagnostic techniques, including traditional methods such as bacteriology, mycology, and virology, as well as newer diagnostic approaches such as molecular biology, new-generation sequencing, in situ hybridization, and immunohistochemistry. The use of these techniques in the detection, pathogenesis, and identification of infectious agents of livestock animals as well as their advantages and limitations can be presented in this Special Issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
