

## Foodborne Bacteria–Host Interactions 2.0

Guest Editors:

**Dr. Anja Klančnik**

Department of Food  
Microbiology, Biotechnical  
Faculty, University of Ljubljana,  
Ljubljana, Slovenia

**Prof. Dr. Maja Abram**

Department of Microbiology and  
Parasitology, Faculty of Medicine,  
and Clinical Hospital Centre  
Rijeka, University of Rijeka,  
Rijeka, Croatia

Deadline for manuscript  
submissions:

**31 August 2024**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue is a continuation of our 2022 Special Issue "Foodborne Bacteria–Host Interactions".

Food contamination can occur at any stage of the farm-to-consumer continuum from environmental, animal, or human sources, causing foodborne illnesses that are a global public health problem and affect an estimated 600 million people annually. Pathogen–host interaction addresses the understanding of (i) host–species interaction with insights into molecular pathogenesis, the evolution of pathogenic microbes, and the potential of pathogens to cross the species barrier to infect new hosts; and (ii) mechanisms by which pathogenic bacteria communicate with other microorganisms and interact with the host, which is critical for the application of innovative control strategies.

As Guest Editors of this Special Issue, we invite you to submit research articles, review articles, and short communications related to foodborne bacteria–host interactions, in particular, regarding topics such as pathogenesis, virulence factors, physiology, gene regulation, and immune response.

Prof. Dr. Anja Klančnik

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
