Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editor

In this Special Issue, we aim to address the relevance of host-pathogen interactions for experimental and applied therapy. In particular, investigations into mechanisms and pathogenic strategies could provide new ideas to develop innovative tools that can be utilized to modulate microbial pathogenesis. We welcome the submission of research material focused on any of the different biological interaction points mentioned above, hoping that these will result in a better understanding of pathogen-host biological interactions and open new doors in scientific research.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
