

## Phytoplankton-Bacteria Interactions 2.0

Guest Editor:

**Dr. Katherina Petrou**

School of Life Sciences,  
University of Technology Sydney,  
Sydney, Australia

Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editor

This Special Issue is the continuation of our 2021 Special Issue “Phytoplankton–Bacteria Interactions”.

We kindly invite authors to submit a review article, an original research article, or a short communication on topics related to

1. the evolutionary development of phytoplankton–bacteria associations,
2. the physiological and metabolic responses controlling their interactions,
3. phytoplankton–bacterial modulation of biogeochemistry or nutrient cycling,
4. the ecological or physiological role of bacteria in harmful algae, and
5. the chemistry or chemical signaling of phytoplankton–bacteria associations. Method studies or perspectives on new methodologies and techniques for probing these relationships are also welcome

Keywords:

- environmental microbiology
- microbe interactions
- phytoplankton ecology
- biogeochemical cycling
- microbiome
- pathogenicity
- symbioses
- chemotaxis

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
