Message from the Guest Editors

We look forward to receiving your contributions to this Special Issue in the form of original research and review papers which help to uncover ecological and immune-physiological interactions between entomopathogenic fungi and various organisms, including (i) interactions of the fungi with target and nontarget animals, (ii) interactions with plants, and (iii) interactions with microorganisms associated with insects and plants. Works on molecular and biochemical mechanisms of interaction between fungi and organisms from other kingdoms will be prioritized.

Deadline for manuscript submissions:

closed (31 August 2023)

an Open Access Journal by MDPI

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
