Productos Naturales,
Universidad de Costa Rica, San
José, Costa Rica

Message from the Guest Editors

For this Special Issue, we aim to explore the diversity and spatiotemporal distribution of microorganisms from different extreme environments using the different tools available to microbial ecologists. We encourage researchers to send original articles, reviews or short communications that advance our understanding of extreme microorganisms, ecosystems or microbial processes. Submissions comparing communities from different environments or otherwise providing an integrative view of extreme microbiology are particularly encouraged.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
