submissions:  
**closed (31 July 2021)**

### Message from the Guest Editors

Dear Colleagues,

For this Special Issue of *Microorganisms*, dedicated to the management and antiretroviral treatment of HIV infection, we invite you to send your contributions concerning any aspects related to this essential topic.

In fact, although HIV research has made significant progress, we believe that there are still unmet needs requiring more study and discussion. This Special Issue could be a great opportunity to clear up all main debated points.

Dr. Vincenzo Spagnuolo

Dr. Camilla Muccini

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
