Message from the Guest Editor

Dear Colleagues,

The purpose of this Special Issue "Arboviruses: Diagnostic, Phylogeny and Interactions" is to cover a wide range of topics focusing on arbovirus infection and aims to fill the gaps in our knowledge on arbovirus–host interactions, vector competence, diagnosis, and arboviral molecular epidemiology. All types of articles will be considered for publication, including short reports, original research, and review articles.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
