

New Cationic Antimicrobial Peptides

Guest Editors:

Prof. Dr. Miguel Viñas

Laboratory of Molecular Microbiology & Antimicrobials Medical School, Department of Pathology and Experimental Therapeutics, University of Barcelona, Barcelona, Spain

Prof. Dr. Fernando Albericio

1. School of Chemistry and Physics, University of KwaZulu-Natal, Durban, South Africa
2. Department of Organic Chemistry, University of Barcelona, Barcelona, Spain

Message from the Guest Editors

Antimicrobial peptides (AMPs), either natural or synthetic, are viewed as molecules of extraordinary interest for their ability to kill multidrug-resistant bacteria, but also for their ability to sensitize bacteria to some agents to which they had become resistant.

We invite you to contribute to this Special Issue by submitting papers on purification, synthesis, determination of antimicrobial activity, mechanisms of action, interaction between peptides and membranes, antimicrobial peptides targets, and related topics.

Deadline for manuscript submissions:

closed (30 April 2021)

an Open Access Journal by MDPI

Research, 04318 Leipzig,
Germany

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
