

Ecology and Emergence of Zoonotic Viruses

Guest Editors:

Dr. Sasha R. Azar

Department of Pathology,
University of Texas Medical
Branch, Galveston, TX 77555, USA

Dr. Tierra Smiley Evans

One Health Institute, School of
Veterinary Medicine, University of
California, Davis, CA, USA

Message from the Guest Editors

The aim of this Special Issue is to facilitate a multidisciplinary exchange of cutting-edge laboratory, computational/modeling, and field research on the ecology and emergence of zoonotic viruses. In this Special Issue, we earnestly invite our colleagues to contribute both basic and applied original research articles, as well as reviews on any subject pertaining to the evolution, ecology, dynamics, and emergence of zoonotic viruses.

Deadline for manuscript
submissions:

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
