Emilia, Modena, Italy

Deadline for manuscript  
submissions:

**closed (30 November 2020)**

### Message from the Guest Editor

Dear Colleagues,

HIV infection has become a chronic disease and there is a presumption that most of the problems related to this disease have already been solved. In reality, too many subjects are still diagnosed late and many knowledge gaps remain to be filled in prevention, diagnosis, the cascade of care, drug-related side effects, and co-morbidities. This Special Issue will give a platform for practitioners and researchers operating in the HIV field to exchange original data and innovative viewpoints.

For this purpose, we cordially invite you to submit research articles, articles, and short communications related to the various aspects of HIV infection on the basis of your expertise.

Prof. Dr. Cristina Mussini

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
