Deadline for manuscript  
submissions:

**closed (30 April 2020)**

### Message from the Guest Editors

Dear Colleagues,

The Special Issue entitled “Microbiota-Gut-Brain Axis” aims to present recent research on the diverse roles of the gut microbial milieu and mycobiota between disease and dysbiosis. Some of its focal points include, but are not limited to, the following:

- Gut microbiota and neurological disease and disorders
- Gut microbiota and the GI tract
- Gut microbiota and the endocrine system
- Gut microbiota and the enteric nervous
- Gut microbiota and the immune system
- Gut microbiota and the central nervous system

Prof. Dr. Mark Obrenovich

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
