

## New Perspectives in Controlling the Spread of Multi-Drug Resistance Organisms (MDROs)

Guest Editor:

**Prof. Dr. Jean-Ralph Zahar**

Infection Control Unit, French-Muslim Hospital, Avicenna, 93000 Bobigny, France

Deadline for manuscript submissions:

**closed (30 June 2023)**

### Message from the Guest Editor

In this issue, we propose to address important questions that would allow us to consider MDRO control in our hospitals differently, such as:

- What are the lessons to be drawn from the COVID-19 pandemic and the spread of MDRO?
- Are MDRO organisms the same or different in terms of risk?
- Are contact isolations mandatory to control the spread of MDRO?
- Are adverse events related to contact isolation?
- What is the role of microbiota in acquisition and clearance of MDRO?
- Is it necessary to control the risk related to the environment? If so, when and how?
- Is decolonisation useful? When? For what organisms? How?

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
