# Soil Microbial Communities and Ecosystem Functions

Guest Editor:

#### Prof. Dr. Efimia M. Papatheodorou

Department of Ecology, School of Biology, Aristotle University of Thessaloniki, Thessaloniki, Greece

Deadline for manuscript submissions: closed (31 December 2022)

### Message from the Guest Editor

Dear Colleagues,

In this Special Issue of *Microorganisms*, we invite authors to send their contributions concerning any aspect that could affect the relationships between microbial organization and soil functionality: metrics of analysis, spatial scale or different environmental conditions, as well as the influence of perturbations on the above-mentioned relationships. In this Special Issue we welcome original research papers, review articles, and short communications. Research areas may include, but are not limited to, ecology, microbiology, and biogeography.

I look forward to receiving your contributions.

Prof. Dr. Efimia M. Papatheodorou *Guest Editor*

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in highquality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases. **Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
