Deadline for manuscript submissions:
closed (31 May 2023)

Message from the Guest Editor

This Special Issue of Microorganisms aims to provide a scientific platform for scientists performing fundamental, applied and translational research related to the Bacillus cereus group species. This Special Issue will include original studies, reviews and method papers on these Bacillus pathogens related to their genomics, gene regulation, sporulation, exotoxins, structural biology, bacteria–host interactions, animal models, vaccines, ecology, epidemiology, etc. In addition, studies on rapid diagnostics, decontamination, therapeutics of the Bacillus-related diseases and case reports are also welcome.

Special Issue

Editor-in-Chief

Dr. Nico Jehmlich
Department of Molecular Systems Biology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.
Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology*)
