Message from the Guest Editor

Dear Colleagues,

In the Special Issue of *Microorganisms*, Zoonotic Parasites: *Toxoplasma gondii*, *Trichinella* spp., and *Toxocara* spp., we aimed to collect the latest research related to all aspects of these zoonotic parasites. We call for different types of articles (original research manuscripts, short communications, review papers, etc.). Topics of interest include (but are not limited to) epidemiology, ecology, evolution, host-parasite interaction, transmission/natural cycles, pathogenesis and immunity, relationship with non-communicable diseases (e.g., neurological, psychiatric, allergic, etc.), vaccination, treatment, and clinical parasitology of medical and veterinarian relevance.

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*Microbiology (medical)*)
