

Mechanical Behavior and Fracture Characteristics of Rock in Deep Underground Engineering

Guest Editors:

Prof. Dr. Lianguo Wang

State Key Laboratory for Geomechanics and Deep Underground Engineering, China University of Mining and Technology, Xuzhou 221116, China

Dr. Zhaolin Li

State Key Laboratory of Mining Response and Disaster Prevention and Control in Deep Coal Mines, Anhui University of Science and Technology, Huainan 232001, China

Deadline for manuscript submissions:

closed (14 April 2023)

Message from the Guest Editors

Dear Colleagues,

The Special Issue focuses on the latest and most challenging research topics on rock mechanical behavior and fractures in deep underground engineering, as well as on the mechanism and control of deep engineering geological disasters. We invite researchers to provide original research on the mechanism and control of deep rock mass geological disasters and their applications for this Special Issue. Accordingly, excellent original research papers and state-of-the-art review papers that well reflect advances in dynamic failure characteristics, energy characteristics, and nonlinear mechanical behavior of deep rocks are to be collected. Manuscripts on laboratory experiments, field investigations, theoretical analyses, and numerical simulations are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
