Deadline for manuscript
submissions:

closed (30 March 2024)

Message from the Guest Editors

This Special Issue calls for papers including, but not limited to, the following: (1) cave monitoring work showing the modern processes; (2) the imprints of neomorphic processes on the secondary deposited calcite; (3) the new perspectives on speleothem proxies interpretation; (4) case studies with proxy records based on speleothem to better understand the local and broad paleoclimate change; (5) data cross-comparison among speleothem records, proxies from other depositions and model results.

This Special Issue aims to contribute to the disclosure of all the applications of speleothem and its paleoenvironmental implication.

We thank you and look forward to receiving your contributions.

an Open Access Journal by MDPI

University Bayreuth, D-95440
Bayreuth, Germany

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
