Message from the Guest Editors

Dear Colleagues,

At present, most kinds of non-metallic ore needs to separate gangue minerals, and high-purity non-metallic ore is more conducive to applications in high-end industries. Non-metallic mineral materials or composite non-metallic mineral materials have very mature application technologies in construction, soil remediation, wastewater treatment, the organic and inorganic chemical industry, machinery, photocatalysis, etc. With the advancement of technology, its performance requirements for non-metallic materials are becoming higher.

The Special Issue of “Advances in Non-metallic Ore Separation” is highly welcomes researches to submit papers on topics that include the following: the synthesis of new non-metallic mineral, new or combined separated processes for non-metallic minerals , flotation reagents for non-metallic minerals separation , physicochemical property of non-metallic minerals processing, modification methods and mechanisms on non-metallic mineral surfaces.

We welcome contributions from all practitioners of this scientific topic.

Dr. Zijie Ren

Prof. Dr. Zhiming Sun

Dr. Yupeng Qian

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)
