Deadline for manuscript  
submissions:  
**closed (31 March 2024)**

### Message from the Guest Editors

Dear Colleagues,

Gemstones are sought after due to their beauty, durability, rarity, and high value. Ever since their discovery, gemologists have been seeking genetic connections with geology, because they represent special geological conditions which can provide a window for understanding the special formation of gemstones, even as earth evolves.

This Special Issue aims to present gemstone deposits in relation to gemology, mineralogy, petrology, geochemistry, geochronology, etc. We are interested in combined research (e.g., field research, geological setting, mineralogy, gemology, petrology, geochemistry, and geochronology).

The Special Issue invites submissions including original scientific research relating to gemstone deposits worldwide. The Special Issue focuses on the following topics: 1) mineralogical, gemological, geochemical, geochronological, and spectroscopy characteristics and their implications on the genesis of gemstones; 2) the forming processes and mineralization mechanisms of gem deposits worldwide; 3) studies of new discoveries of gem deposits and new gem species;

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
