Deadline for manuscript  
submissions:

**closed (31 August 2022)**

### Message from the Guest Editors

Dear Colleagues,

The grinding process, as a primary stage of ore/raw material processing, is a necessary operation in beneficiation plants. It not only provides the appropriate particle size for subsequent separation operations but also enables the liberation of valuable minerals from the gangue. In addition, due to the depletion of high-grade ores and the growing needs of the industry for the processing of low-grade finely dispersed ores, the development of fine/ultrafine milling processes has attracted particular attention in recent decades. This Special Issue welcomes papers that highlight innovations and future trends in modeling grinding and technological ways to improve the grinding efficiency in ore/raw material beneficiation. Emphasis is placed on all issues that contribute to the improvement of process and energy efficiency and reduce the environmental footprint of ore beneficiation and processing plants.

## Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), GEOBASE, GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)
