Deadline for manuscript submissions:
closed (15 October 2021)

Message from the Guest Editors

It is our pleasure to announce a Special Issue of *Minerals* entitled “Kimberlites and Their Deep Cargo: Mineralogy, Geochronology, and Isotope Chemistry”. Since their discovery more than two centuries ago, interest in kimberlites has not diminished over the years. Kimberlite eruptions bring material from the lithosphere/asthenosphere boundary (~250 km and sometimes even deeper) to the uppermost parts of the Earth’s crust. Erupting through the Archean cratons kimberlites, they thus represent a unique archive of information on geological processes for the span of time from circa 3.6 Ga until the time of eruption.

For this Special Issue, we invite the submission of papers and reviews of mineralogical, geochemical, and isotopic studies on the cratonic mantle, crustal and mantle xenoliths, diamonds, kimberlites, and kimberlite indicator minerals. We welcome fundamental and experimental studies to contribute to a better understanding of cratonic composition, evolution, thermal regime, and the processes that form and destroy diamonds.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
