

Mineralogy and Geochemistry of Ruby

Guest Editors:

**Prof. Dr. Frederick Lin
Sutherland**

Mineralogy and Petrology,
Geosciences, Australian Museum,
1 William Street, Sydney, NSW
2010, Australia

Prof. Dr. Khin Zaw

Centre of Ore Deposits and Earth
Sciences, School of Natural
Sciences, University of Tasmania,
Hobart TAS 7001, Australia

Deadline for manuscript
submissions:

closed (20 March 2020)

Message from the Guest Editors

This Special Issue planned for *Minerals* aims to attract further studies on this multi-origin gem mineral. Investigations at the ‘economic border’ of ruby and sapphire nomenclature and relevant treatments affecting ruby color will be considered.

The keywords are:

- gem corundum
- ruby research
- trace elements
- spectroscopy
- O isotopes
- inclusions;
- P-T genesis
- metamorphic reactions
- gem deposits
- geographic typing

Editor-in-Chief

Prof. Dr. Leonid Dubrovinsky

Bayerisches Geoinstitut,
University Bayreuth, D-95440
Bayreuth, Germany

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Mining and Mineral Processing) / CiteScore - Q1 (Geology)
