

## Potentially Toxic Elements in Soils and Mining Residues

Guest Editors:

**Prof. Dr. Antonio Fernandes**

**Dr. Silvio Junio Ramos**

**Dr. Edna Santos de Souza**

**Dr. Gabriel Caixeta Martins**

Deadline for manuscript  
submissions:

**closed (10 May 2022)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue invites research and review articles on potentially toxic elements (PTEs), such as metals, nonmetals and rare earths, in natural (background and quality reference values), anthropized (baselines), and mining areas. The characterization and identification of contaminated areas is of fundamental importance, mainly due to the increasing occupation by the population, whether in abandoned urban, agricultural, mining, or industrial areas, in order to reduce health risks. In view of that, the editor and co-editors of this Special Issue invite authors to submit new quality research articles and reviews on PTEs in agricultural, urban, mining, and industrial areas, in recovery or recovered, with agricultural or forestry use in soils and mining tailings. Potential topics include but are not limited to background and quality reference values of PTEs; contamination by PTEs; spatial distribution of PTEs; remediation of PTE-affected sites; environmental and human health risks from PTE exposure; management and treatment of PTE-contaminated waste; and multivariate analysis and modeling of PTEs.

## Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
