

Reservoir Geology and Oil & Gas Reservoir Characterization

Guest Editors:

Dr. Xianguo Zhang

Dr. Hongliu Zeng

**Dr. Muhammad Jawad
Munawar**

Dr. Tao Zhang

Dr. Youjing Wang

Message from the Guest Editors

Our focus in this Special Issue includes formation mechanisms, characterization methods, distribution law, control factors and other issues of reservoir heterogeneity as well as a discussion on scientific and technical issues related to reservoir geological characteristics. Altogether, we will investigate new problems and new challenges and present new, exciting opportunities for this field. We look forward to your contributions to this Special Issue.

Message from the Editor-in-Chief

Minerals welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Geochemistry and Geophysics*) / CiteScore - Q2 (*Geology*)
